

Why Versius?

We exist to bring the  
benefits of minimal  
access surgery to  
everyone who needs it

---

# The global reality

- The benefits of minimal access surgery are as numerous as they are compelling
- For millions around the world minimal access surgery is simply not accessible

So, how will we do this?

---

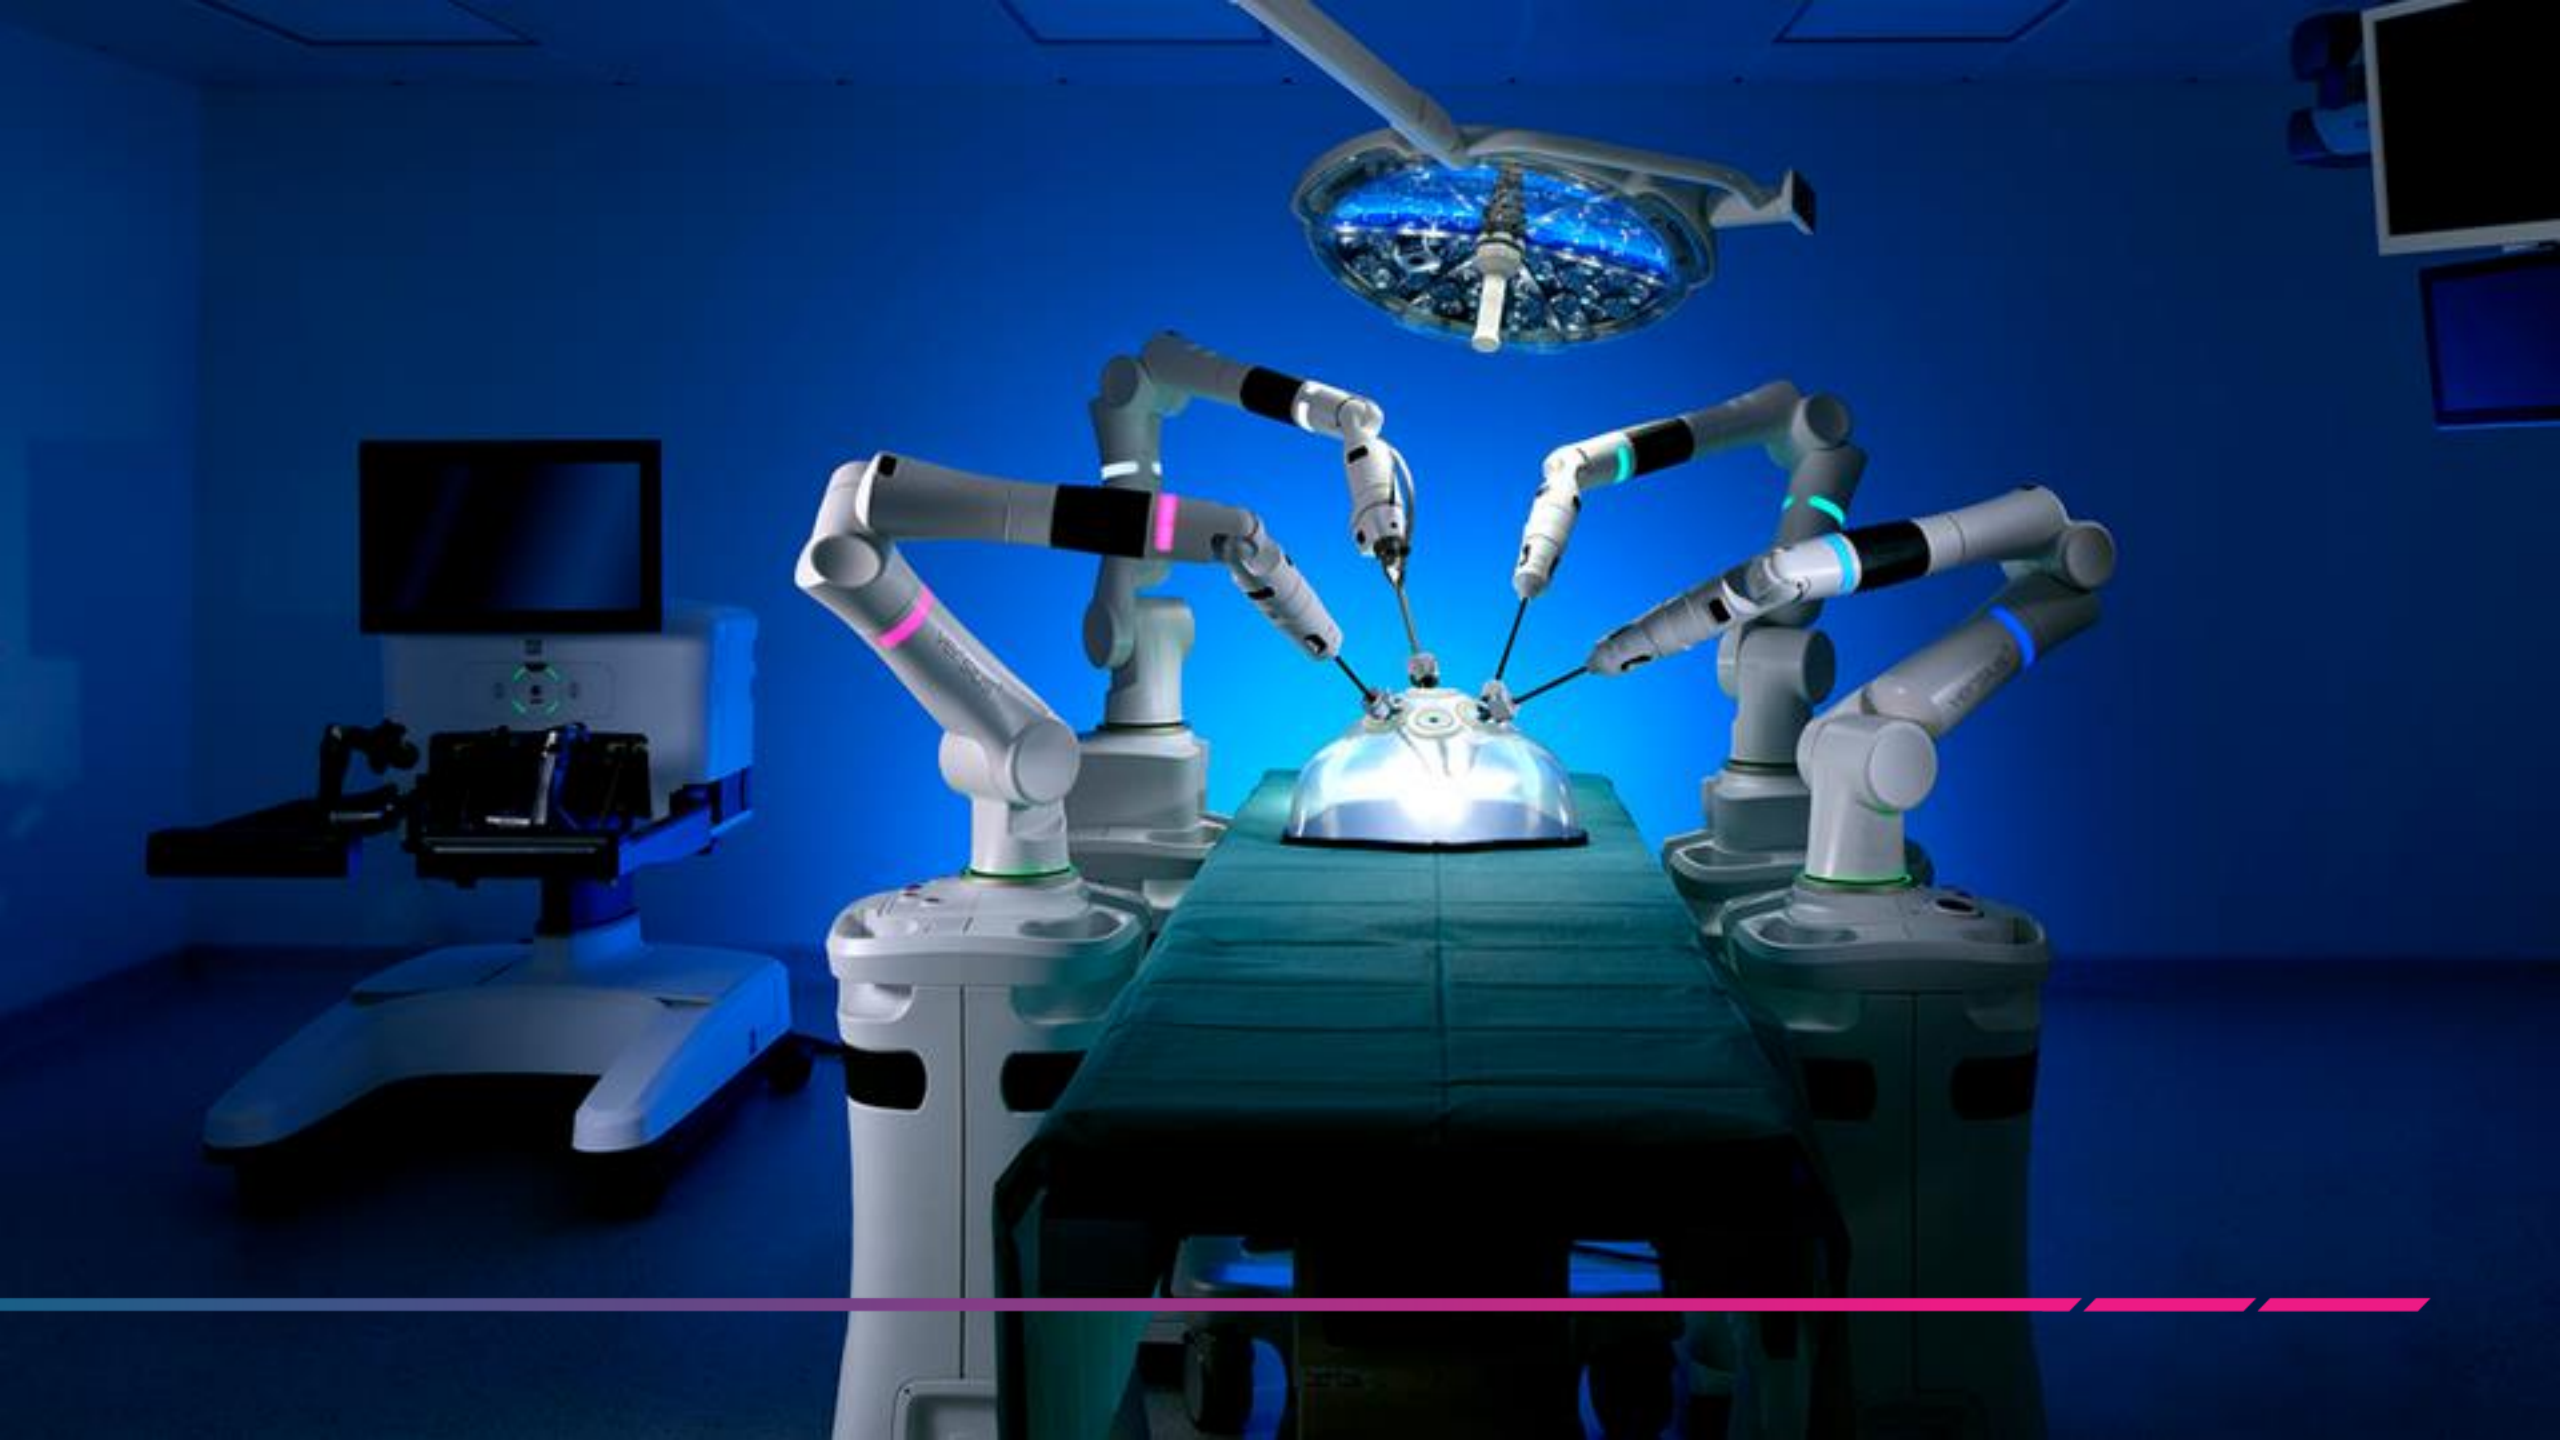

# Change the paradigm

Patients should always receive the highest quality of surgical care.

By **thinking laparoscopically and operating robotically** with Versius, patients, surgeons and healthcare professionals can all benefit from the value that MAS brings.

Meet Versius

---

# Why Versius?

Versius is a **modular** system designed to help surgeons **do more**.

Technology that is delivered at a **human scale**.

A versatile system designed to enable **more MAS procedures**.

Develop a **long-term two-way partnership**, not just sales.

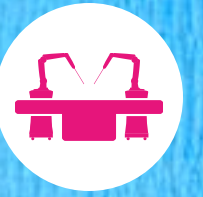

Versius inserts a **digital interface** between surgeon and patient.

# Helping surgeons do more: the benefits of robotics with a laparoscopic approach

# Small, fully-wristed instruments give greater dexterity

# Small and portable technology delivered at a human scale

# Versatile approach through modular and open design

# Open console facilitating team communication

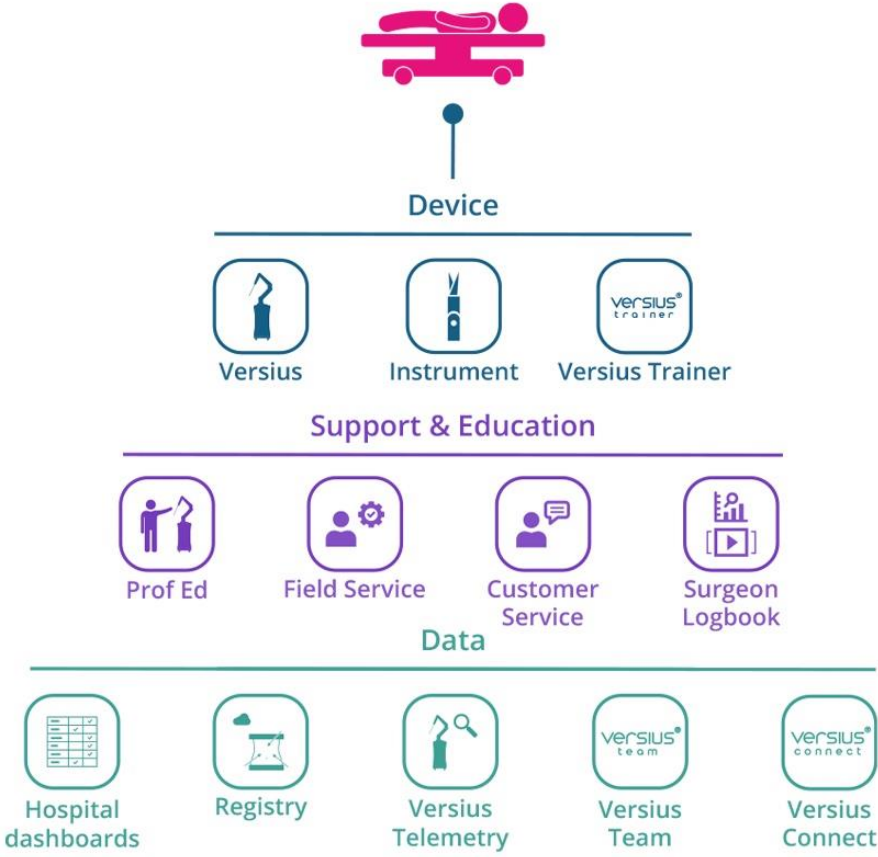

# Long-term two way partnership

We have a shared mission to bring MAS to more patients.  
We are nimble and responsive to customer needs.

# An ecosystem that starts with Versius

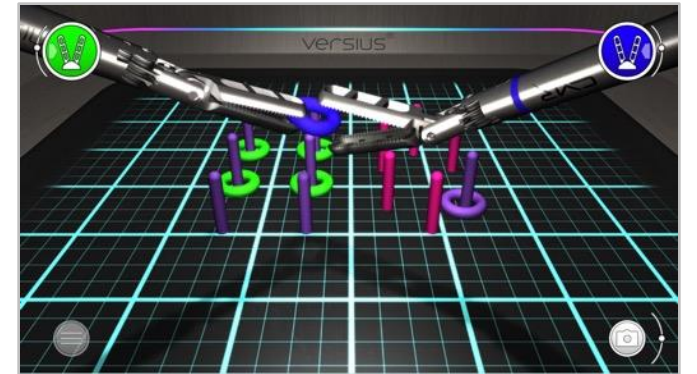

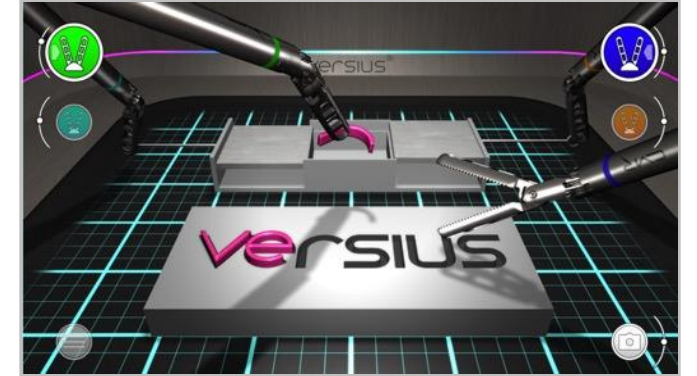

A digital interface between surgeon and patient

# The Versius Trainer

## Digital Surgical Skills Simulator

- Digital skills environment to learn Versius
- Measure acquisition of skills
- Log to Versius Connect as a digital training log book

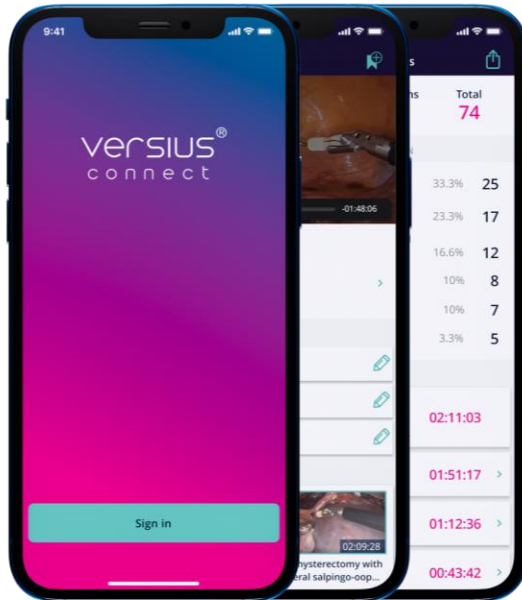

# Data fed back to you in a meaningful way

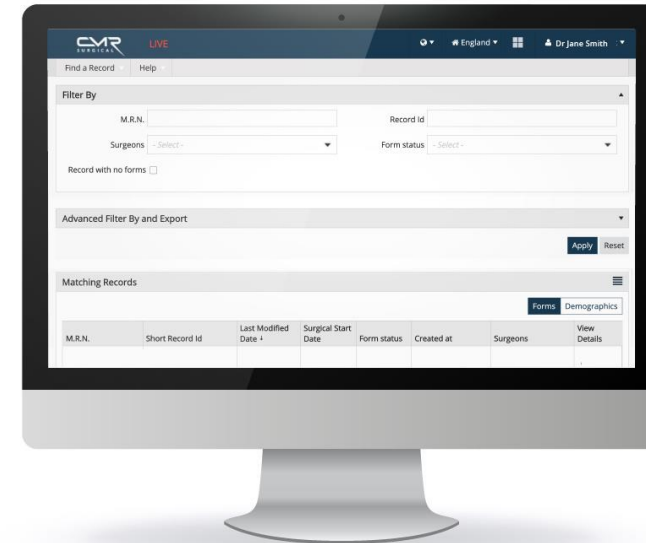

## Versius Connect Surgeon Platform

Data you want to see, when you want to see.

## CMR Surgical Registry

Post-market surveillance and safety monitoring

# All new Versius Connect web app

Where are we now?

---

# Our clinical progress

- More than 5,000 procedures across gynecology, colorectal, thoracic, general surgery, hernia and urology
- Working across Europe, India, Asia, Australia, South America and the Middle East
- Further expansion planned

# Growing peer-reviewed publications

11

Preclinical  
Assessments

14

Clinical  
Assessments  
(across a range of  
specialties)

8

Technology,  
surgical training  
and ergonomics

# Ownership Options

# The IDEAL Collaboration

- We believe in responsible device introduction
- Completed *Phase 2b Exploration* phase with two cohort studies for general surgery and gynaecology
- Moving to *Phase 3 Assessment* and *Phase 4 Long-term study* with a mandatory prospective clinical registry for all comers

A robotic arm with 'versius' branding is shown in a surgical setting. The arm is white with teal and pink accents. The background is a blurred surgical room with a person in the foreground. The overall lighting is blue and teal.

# First class service delivery

- We listen
- We want to hear from you
- You can feed back into our design
- Together we can help transform surgery, for good.

Transforming surgery.  
For good.
